

KWS PROGAS

Key Features

- MEDIUM EARLY MATURITY
- GOOD STANDABILITY
- AGGRESSIVE TILLERING
- GREAT YIELD POTENTIAL
- EXCELLENT FORAGE QUALITY

Performance at a Glance

10=best

YIELD	8
PROTEIN	8
DIGESTABILITY	8
LODGING	6
SEEDING RATE	.8 UNIT/ACRE

Overview

KWS Progas is medium early maturing hybrid rye. With it's maturity 1-2 days behind traditional VNS rye it makes for an easy replacement. High feed scores and yield set this variety apart in it's maturity. Lower seeding rates help with efficiency at planting time. High protein and digestibility scores make it a great option for any dairy farmer looking for high quality feed.
